

A Joint Purchasing Program For Local Government Agencies

December 1, 2021

Mr. Frank M Ventrella
Senior Sales Executive - IL Government & Education
Granite Telecommunications, LLC
100 Newport Ave.
Quincy, MA 02171

Dear Mr. Ventrella,

This letter is to inform you that the Suburban Purchasing Cooperative (SPC) Governing Board has approved the award of the SPC 2021-22 Telecommunication Services Vendor for Term Contract (#205) to Granite Telecommunications, LLC, Quincy, MA from December 1, 2021 through November 30, 2022. The SPC reserves the right to extend the contract for up to four (4) possible, additional one-year terms upon mutual agreement of both the vendor and the SPC on a negotiated basis.

By acceptance of this contract Granite Telecommunications, LLC agrees to all terms and conditions set forth in the specifications contained within the Request for Proposals to which you responded.

Granite Telecommunications, Inc. will handle all billing. The SPC is compensated for program costs it incurs through payment from the vendor, in the amount of a 2% administrative fee of the total amount from each individual order from each purchasing entity. This fee shall be paid directly by the vendor to the Northwest Municipal Conference (NWMC) on a quarterly basis (April 30, July 31, October 31, and January 31). This is not an additional fee to be paid for by the ordering entity. The SPC shall not be responsible for any non-payment of any participating agency. Each individual member's agency shall be responsible for insuring delivery of product, receipt and payment of vendor invoices, as well as for the resolution of disputes between the vendor and the member agency.

The SPC looks forward to an exciting and productive year working with Granite Telecommunications, LLC. Please sign and date this agreement below, retaining copies for your files and returning the original to my attention.

Sincerely,

Ellen Dayan, CPPB

Vendor Product or Identification Number	Product Description	Pricing	
		Purchase Unit or Measure	Price
Hosted PBX (ePO'S)	based service that delivers digital voice to an analog device, through the use of an ATA. The ATA, analog telephone adapter, is a device that connects analog telephones and similar customer premises devices to a digital IP Network. For customers with a large amount of analog telephones customers have the option to purchase an Adtran, an IP Business Gateway, which can support up to 24 telephone lines	EA - MRC	\$15.02
Base Seat	The base level is the introductory seat of the Hosted PBX. The standard base seat features are: Call Forwarding, Call Waiting, Call Transfer, Call Pickup Groups, Speed Dials, Short Codes, Intercom Dialing, 3-Way Calling, Call Park, Paging via an IP Phone, Line State Monitoring, Directed Call Pick up, CommPortal access, Call Screening Features, SimRing and Music on Hold	EA - MRC	\$13.01
Business Seat	The Business seat is the next level of the Hosted PBX. The Business features include all features included in the base seat as well as the following: Voicemail, Incoming Call Manager, Find Me Follow Me, Voicemail with Fax, Accession Communicator and Music on Hold	EA - MRC	\$16.03
Executive Seat	The executive seat is the highest level of seats for Hosted PBX. The Executive Seat features all base seat features as well as the following: Incoming Call Manager, Find Me Follow Me, Accession Communicator and Music on Hold	EA - MRC	\$25.04
Call Path	A logical connection over IP that allows a SIP based VOIP call (inbound or outbound) to be established with Granite's MetaSwitch. Can be ordered individually starting at one. For each active call, a call path is deducted from the configured amount of call paths allowed until that call is disconnected	EA - MRC	\$5.00
Hot Desking	Allows logging in and out of a desktop phone for agent-based features and extension mobility within a facility	EA - MRC	\$4.99
Voicemail Transcription	Enables voicemail messages to be transcribed and sent as an email and/or viewable in Commportal	EA - MRC	\$5.00
Voicemail (Stand Alone)	A voicemail box that is not tied to a user's extension. Typically assigned to a main number as a general mailbox for inbound calls	EA - MRC	\$17.02
Easy Auto Attendant (Stand Alone)	A single level call tree that allows advanced routing features and initial call servicing to inbound callers by pressing 0-9 on their phone. Also allows agencies to define separate menus to be played during and outside of normal business hours	EA - MRC	\$15.53
Premium Auto Attendant (Stand Alone)	A multi-level call tree that allows advanced routing features and initial call servicing to inbound callers by pressing 0-9 on their phone with multiple submenus for each option. Also allows more control over scheduling by providing more advanced time options over during and outside of business hours with a configurable option to transfer directly to voicemail	EA - MRC	\$27.56
Easy Auto Attendant	A single level call tree that allows advanced routing features and initial call servicing to inbound callers by pressing 0-9 on their phone. Also allows agencies to define separate menus to be played during and outside of normal business hours	EA - MRC	\$8.02

Pilot TN for MLHC	A main DID that routes calls to a predetermined list of extensions configured in a multi-line hunt group	EA - MRC	\$7.52
Directory Assistance (per call)	Operator assisted service used to find a telephone number	EA - MRC	\$6.00
Basic Call Recording (per seat)	The ability to record inbound calls on an individual extension to off-site cloud storage. Storage priced separately	EA - MRC	\$15.03
Compliance Call Recording (per seat)	The ability to record inbound calls on an individual extension to off-site cloud storage that adheres to compliance standards, such as HIPAA. Storage priced separately	EA - MRC	\$35.07
Monitored Call Recording (per seat)	The ability to record inbound calls on an individual extension to on-site cloud storage with additional features such as speech analytics, screen recording, live monitoring, and agent evaluation	EA - MRC	\$55.11
Phone Set up Installation	Storage priced separately Installation of Hosted PBX from Granite by a trained professional technician for additional phones	EA - MRC	\$25.05
Hosted PBX Installation	Installation of Hosted PBX from Granite by a trained professional technician. Install and test one Granite provided router, switch or Integrated Access Device (IAD) with the installation of 4 digital IP Phones. The technician will arrive at the designated site, make contact and confirm arrival with the LCON. The technician will then locate the designated work area and the Customer Premise Equipment (CPE) and any additional peripherals required for completion of the installation. The technician will also conduct a visual inspection of the CPE and peripherals to ensure compatibility and serviceability of all required items. The technician will then install and test one Granite provided and preconfigured router and/or switch in the designated location or demarcation point (D-marc) or Minimum Point of Entry (MPoE). If the D-marc needs to be extended or any additional work is required, the work will be billed at the established Time & Materials rates. Standard rate includes only an hour of labor. After the first hour, an additional fee of \$125 per hour in 30-minute increments will be charged. Ranges from standard handset installation at user desks to router and PoE switch installation and cabling, if needed. Cabling and router/switch install are ICB.	EA - MRC	\$298.59
SIP Call Paths 0-100	SIP Call Paths are the logical connectivity for an individual call, either inbound or outbound, to be established with an end user of a Session Initiated Protocol Voice over Internet Protocol service provider and the calling/called party across the Public Switched Telephone Network. These can be requested in quantities of one with no predetermined maximum limit. When ordered to a single customer and configured on the customer's IP PBX, it is known as a SIP Trunk with the quantity SIP Call Paths, also known as Concurrent Call Paths, configured for that individual customer. **includes local calling	EA - MRC	\$10.01

DID	end users on a Private Branch Exchange of a customer that subscribes to a trunking service to access the PSTN. These numbers are globally unique and allow inbound calling to be delivered to users of a PBX individually or as a primary pilot number within the PBX to reach a hunt group or an auto attendant. DID numbers can be ordered individually but are usually ordered in blocks of 20 or 100	EA - MRC	\$0.30
SIPCommPortal	Granite's SIP Portal is an online tool that can be accessed from a web browser by a SIP Trunking customer, usually a telephony system administrator, for DID configuration and routing and call analytics on the SIP Trunking service. A Burstable Call Path is the same as a regular call path in the sense that it provides a Granite SIP Trunking customer access to the PSTN over a SIP based VoIP connection. The difference is Bursting allows a customer to temporarily use more than the predetermined base number of concurrent call paths (CCP), at a rate up to 50% more. For example, if a customer subscribes to 10 CCPs, the 11th call, inbound or outbound, will receive a busy tone. When a customer subscribes to bursting they are billed for the base quantity of 10 unless they have an event of higher than normal call volume. That 11th call, and up to 50% more than the base for a total of 15 CCPs, will be connected without the need for Granite's intervention. The amount of call paths that burst above the base number will be billed for the month in which they are used (in the example	EA - MRC	\$4.01

Trunk Roll Setup Fee	A Trunk Roll Fee is a one-time fee charged to install any necessary hardware needed to terminate the Granite provided SIP Trunking service. This fee is optional and only needed when a customer requests a dedicated access circuit for the bandwidth needed for SIP trunking service.	EA - One Time Fee	\$20.04
Direct Trunk Overflow	Direct Trunk Overflow is a feature of Granite's SIP trunking service that allows multiple customer PBX's the ability to act as primary and backup, load balanced pairs or separate individual objects with DID failover capabilities. DTO will allow the total number of call paths across all PBXs that have a configured SIP Trunk to be available to a single customer PBX if one should fail or lose access to the PSTN. Also, if one PBX fails or loses access to the PSTN, DID failover to the customer's other PBX is automatic without any intervention from Granite or the customer.	EA - MRC	\$199.39
Intralata Long Distance (per minute)	Long Distance is offered in two separate manners for SIP services. If a user plans to use only local calling, they may pay for Long Distance on a per minute rate. Porting	Porting: Porting of customer lines. Please Note: Ports of over 100 DID's are considered "project ports" or "bulk orders" and do not follow the standard 1-day port timeline. Ports of this size are at least a 30 day SLA, not including equipment provisioning. Often ports of this size or larger have additional issues on the carrier side that Granite cannot predict or control. Carriers can reject port requests of this for a variety of issues, making the actual provisioning time even longer.	EA- NRC	\$0.00
