Secretary Daniel DiMaria Morton Grove

Treasurer Ghida Neukirch Highland Park

Executive Director Mark L. Fowler NORTHWEST COUNCIL OF MAYORS TECHNICAL COMMITTEE Friday, April 6, 2018 8:30 a.m. BARRINGTON VILLAGE HALL Board Room 200 S. Hough Street Barrington, Illinois 60010

AGENDA

Call to Order

Ι.

II. Approval of February 2, 2018 Meeting Minutes (Attachment A) Action requested: Approval of minutes

III. Agency Reports

- a. CMAP Report
- b. CMAP Council of Mayors Executive Committee
- c. IDOT Highways Report
- d. IDOT Local Roads Update (Attachment B)
- e. Cook County Department of Transportation and Highways (Attachment C)
- f. Metra
- g. Pace
- h. Illinois Tollway
- Action requested: Informational

IV. Surface Transportation Program (STP) Update (Attachment D)

Staff will provide an update to projects currently programmed in the Council's Surface Transportation Program. The program has been updated to show target obligation and letting dates of all projects. **Action requested:** Approval of Program

V. Cost Increase Requests (Attachment E)

Given the constrained regional programming situation, staff has summarized potential impact of cost increases for existing projects in the council program. **Action requested:** Discussion

VI. STP Project Selection Committee Update (Attachment F)

Staff will provide an update on the work of the committee, including the first draft Active Program Management policy proposal. **Action requested:** Discussion VII. Northwest Council Methodology Update Discussion (Attachment G) Since the last Technical Committee, a working group has met twice to discuss potential updates to the council's methodology. Staff will provide an update and requests discussion on future direction. Action requested: Discussion

VIII. Other Business

IX. Next Meeting

The next Northwest Council of Mayors Technical Committee meeting is scheduled for June 1, 2018.

X. Adjourn

Attachment A

TO: Northwest Council of Mayors Technical CommitteeFROM: Mike Walczak, Northwest Council Planning LiaisonRE: February 2, 2018 Meeting MinutesDATE: February 6, 2018

The Northwest Council of Mayors Technical Committee resumed their September 14 meeting on Friday, February 2, 2018 at Barrington Village Hall. The following persons were in attendance:

President Karen Darch, Chair Sharon Caddigan (representing President Billie Roth) President Tom Hayes Jim Norris Reid Ottesen (representing President Jim Schwantz) Matt Roan (representing Ray Rummel) Brian Townsend Village of Barrington Village of Streamwood Village of Arlington Heights Village of Hoffman Estates Village of Palatine Elk Grove Village Village of Schaumburg

NWMC

Mike Walczak

I. Call to Order President Darch called the meeting to order at 8:30 a.m.

II. Approval of Minutes

The minutes of the November 2, 2017 Technical Committee meeting were approved on a motion from Mr. Norris, seconded by Ms. Caddigan.

III. Agency Reports

a. CMAP

Ms Maddux provided updates on the CMAQ and STP regional expenditures. She described the new Local Pavement Program that CMAP will be working with municipalities on. She also announced an ON To 2050 Launch event for October 10.

b. CMAP Council of Mayors Executive Committee

Ms. Maddux reported that on January 23, the committee approved the FY 2019 Planning Liaison Scope of Services, discussed the STP Project Selection Committee, received a regional freight update and heard about CMAP's Legislative Agenda.

c. IDOT Highways

Mr. Farmer reported that all 2018 projects that were delayed for budgetary reasons have now been set for the April or June lettings. He also discussed other changes to his status sheets.

d. IDOT Local Roads

Mr. Fierro updated the committee on the status of various projects, noting changes there were few changes since the last meeting. He noted that Elk Grove Village's JF Kennedy project had been let in January.

e. Cook County Department of Transportation and Highways.

Mr. Beata announced the 2018 Invest In Cook call for projects. He also discussed his project updates, noting that Roselle Road in Schaumburg has been delayed and Touhy Ave is set for July 2018.

f. Metra

Mr. Mack announced that the Metra Board will be discussing the results of a Fare Study. The Cumberland Station in Des Plaines is under construction and should be done by August.

g. Pace

Mr. Walczak reported that Steve Andrews could not attend, but Pace handouts were available at the meeting.

IV. Surface Transportation Program (STP) Update

Mr. Walczak discussed latest council program, noting the projects that were moving back from FY 2018 to 2019. Currently no projects are set to fall past 2020 and all of the council's

planned expenditures are still moving forward. The committee discussed the role they can take now that the program has been set. Mr. Norris recommended being more aggressive with programming and allowing any project to request to move up to spend the regional funding. Ms. Dobbs and Mr. Fierro explained how CMAP and IDOT determine when projects are ready to be obligated. Mr. Ottesen suggested that the program should show the status of all projects, not just those in the active list to give the committee a picture of what projects could move forward.

The committee approved the revised program on a motion by Mr. Norris, seconded by President Hayes.

i. Rolling Meadows Reinstatement Request

Mr. Walczak explained that the City of Rolling Meadows was asking for its Plum Grove Road lighting project, which was moved from to the MYB, be moved back into the active program since they had already expended local funds on engineering. Mr. Ottesen asked whether the project would include road improvements. Mr. Horne said it was only for lighting. The committee reaffirmed its original decision to move the project to the MYB list.

ii. Cost Increase Requests

Mr. Walczak explained that several existing projects have requested cost increases. However, given the funding situation, cost increases could only be offset by reducing funding to other projects. Ms. Dobbs explained how CMAP staff handle cost increase requests, allowing offsets for increases as long as regional funding is available. The committee discussed looking at options including capping increases and asked staff to prepare options at the next meeting.

V. Surface Transportation Program (STP) Project Selection Committee Update

President Darch and Mr. Walczak provided a summary of the last meeting, including the discussion of Active Program Management policies. Mr. Townsend voiced his concerns about the IDOT approval process, including the right-of-way acquisition process. President Darch suggested that improvements could be made at the local level through Active Program Management as well as improving the IDOT process. The committee Mr. Norris asked that the Technical Committee send a letter to Mayor Schielke summarizing their concerns to this point and staying involved in the process.

Mr. Walczak also discussed the impacts that the new policies could have on the council's methodology. The committee recommended reforming the STP Methodology Working Group to discuss the impacts and start to look at what changes could be made to the council's methodology.

VI. Other Business

Mr. Ottesen asked for an update to the council's Functional Classification requests.

VII. Next Meeting

President Darch announced that the next meeting is scheduled for Friday, April 6 at 8:30 a.m. at the Barrington Village Hall.

VIII. Adjournment

The committee adjourned on a motion by Mr. Townsend, seconded by Ms. Caddigan.

PLANNING STUDIES

COOK COUNTY FREIGHT PLAN Draft plan under development in Spring 2018 Next Advisory Committee meeting scheduled for May 22, 2018 Approval of final plan by Cook County Board expected September 2018 Presentations to Councils of Mayors expected Summer and Fall 2018

ROSEMONT TRANSIT STUDY

Cook County is preparing to take advantage of an opportunity to create a multimodal transportation center on County-owned land at the Rosemont Blue Line Station in the Village of Rosemont. The planned improvements include a new bus transfer facility that will increase capacity for Pace buses and create a better connection to the CTA. The cost of the transportation center will be partially covered through joint development of a mixed-use, privately developed office and retail complex. A traffic study of River Road, which fronts the site of the transit center, was just completed and survey and geotechnical work is currently underway as part of the due diligence required for issuance of an RFQ/P for the site's eventual development.

Deer Park Deerfield		
Des Plaines	Subject:	Cost Increase Requests
Ik Grove Village	-	
Evanston	Data	
Fox Lake	Date:	April 6, 2018
Glencoe		
Glenview		

Recommendation: Develop a policy for cost increase requests for Northwest Council of Mayors projects through FY 2020.

Issue: Under the recently approved STP Agreement, the regional Surface Transportation Program (STP) funding is locked and advanced funding of projects can no longer be used in To accommodate cost increases to projects that are currently in the programming. Northwest Council of Mayors program, new options must be considered to keep the council's program constrained.

Background: Three possible options for a cost increase policy are:

Do not allow any cost increases

This option would keep projects in FY 2018-2020 at their currently programmed amounts. This option is the simplest, but shifts the burden of any cost increases for projects onto municipal budgets.

Keep existing cost increase request policy

This would allow for review and approval of cost increase requests by the Technical Committee and Northwest Council of Mayors as is currently required. However, this option would require offsetting the cost increase with a corresponding decrease in funds with a project later in the program. Staff would work with CMAP and IDOT to identify projects later in the program and make the recommendation on the decrease to the Technical Committee. If it is an option, the municipality could also offer to offset the cost increase with a decrease to one of their other projects in the program.

This option could also allow the Northwest Council to use more of the region's STP balance by spending more of the funding sooner.

Amend existing cost increase request policy

Another option is to amend the existing cost increase policy. One option for amending the policy is placing a cap on the amount of each increase. This could be a dollar amount cap (i.e. maximum increase of \$250,000), or a cap based on a percent of the phase cost (i.e. maximum increase of 10%). This would still require offsetting the cost increase with a corresponding decrease in funds with a project later in the program, but potentially with a smaller impact.

The Surface Transportation Program (STP) Project Selection Committee met Wednesday, March 28 at the CMAP offices in Chicago. Staff have reviewed CMAP's draft proposal on the initial policy framework for Active Program Management which covers: Program Development, Project Management, Program Management, and Additional Provisions. While NWMC staff look forward to discussing this issue with CMAP staff in greater detail, we would like to share some of our initial concerns regarding this proposal.

The proposal calls for the redistribution of unobligated funds. At the end of a federal fiscal year, unobligated funds from each Council would be redistributed to the new regional shared fund for immediate use. We feel that this sweep of funds from the Councils to the shared fund would reduce the ability of the Councils to effectively manage projects across multiple fiscal years.

This proposal is centered around active program management policies. These policies would require quarterly (at minimum) project status updates. Inactive or delayed projects would be removed from the current year and replaced with projects from a "contingency program" similar to the B-list used by many of the Councils currently. While we agree with the need for improved and simplified project monitoring, the proposed active program management adds a level of unpredictability to project funding that may impede the Councils' ability to effectively advance projects. Given the rigors of the federal funding process, it seems unlikely that a municipality would begin the process without a guarantee that funding would be available.

Lastly, the proposal includes a number of other requirements related to the designation of project managers, the Grant Accountability and Transparency Act (GATA), and public reporting requirements. Staff will monitor these issues to ensure they do not impose an undue burden on municipalities.

At the meeting, CMAP staff suggested they would be open to suggestions from the Councils on how to improve the draft policy. NWMC staff, along with the other Council of Mayors Planning Liaisons, will draft a proposal to mitigate the impact of unobligated fund redistribution. Staff will continue to monitor these developments and update all relevant NWMC committees. CMAP staff will present a revised proposal at the May meeting of the Project Selection Committee.

 Northwest Council of Mayors STP Methodology Working Group

 Evanston
 Fox Lake
 Date:
 April 6, 2018

The Surface Transportation Program (STP) Methodology Working Group met twice since the Technical Committee's last meeting. The committee's discussions centered on the potential changes to the methodology based on the still draft regional Active Program Management (APM) policies as well as improving the overall methodology based on municipal experience. Since the Active Program Management policies will not be completed until September, 2018, specific recommendations were not developed. Rather, staff is seeking discussion and feedback on the options presented to ensure any potential policy changes meet the expectations of the Technical Committee. Staff recommends reconvening the group either this summer if directed by the Technical Committee or after the adoption of the Active Program Management policies.

Eligible Project Types

The working group discussed how to balance the impact of reconstruction projects with the utility of resurfacing projects. While current scoring favors reconstruction, resurfacing may be a better solution in some cases. This topic has been discussed at the regional level APM discussions. The eligibility of bicycle, pedestrian, and lighting projects was also discussed. These projects could be eligible either as part of a larger project or as a standalone project but clearly prioritized after road projects.

Eligible Project Phases

The group discussed awarding more points for projects which forego Phase II or ROW funding. This could speed project implementation once in approved program, but it may punish smaller communities

Due to potential to significantly impact project timeline, the group discussed ways to limit right-of-way funding, including potentially only funding ROW for multi-jurisdictional projects.

Overall Program Management

Due to the size of the MYB list, a sunset provision could be included to require projects to reapply on a regular basis or be removed from the list. The group also thought that projects should be in a five-year capital plan or part of a pavement management system process to be eligible for funding. These proposals have also come up during regional APM discussions.

Executive Director Mark L. Fowler There was discussion on changing the funding ratio or cap, including cap the amount a municipality could receive in one year or over a five-year program. This could help spread funding around to more municipalities and projects.

Increased safety in methodology

The group discussed the need to clearly tie methodology to impactful changes in safety of projects. Make sure the projects make a true safety improvement, since the current methodology scores includes existing safety conditions, but not the level of improvement.

Participation in county or state route projects

Due to limited funding, the group discussed whether projects on state or county routes should try to get other funding first.

Overall Technical Committee

Discussed membership on the Technical Committee and making sure all parts of the council are represented in project selection. They also discussed having site visits or longer presentations for new projects.

Tie methodology more clearly to CMAP's regional performance measures

By shaping the council's scoring system around the federal performance measures which determine the funding distribution, the council could achieve more regional goals, and be in line for additional federal funding once incentives are included in the distribution formula. The council does not currently fund many bridge projects, while bridge condition is one of the five measures.

Regional Scoring Requirements

The group discussed which of the regional priority areas (green infrastructure, reinvestment, freight movement, economically disconnected areas, complete streets, and transit supportive density) should be included in the scoring system. The strongest support was for complete streets and transit supportive density.
